FullStack ToDo App | MERN Stack

- Engineered a real-time ToDo application, offering dynamic updates and comprehensive CRUD functionalities.
- Utilized MongoDB for data storage, Express.js for server-side logic, React for the front end, and Node.js for backend support.
- GitHub: <https://github.com/Sudipto-das/final-fullstack-todo-using-react-nodejs-mongodb>

CodePen Clone | React

- Crafted a responsive web app akin to CodePen, empowering users to compose, edit, and share code snippets effortlessly.
- Implemented a user-friendly interface using React and integrated HTML, CSS, and JavaScript editors.
- GitHub: <https://github.com/Sudipto-das/React-CodePen-Clone>

Responsive Portfolio Project | HTML, CSS & JS

- Designed and developed a visually appealing personal portfolio website to showcase my projects and skills.
- Created a responsive layout and stylized the website using HTML and CSS.
